HIGHLIGHTS

Seeking challenging role in any of the following areas: Business development, Audit, Compliance, Quality and Assurance, Systems Accounting, Management Accounting, Project Accounting, Financial Accounting, Corporate Finance and Investments, Fraud investigations, Information Technology Governance (ITG), Information Technology Risk Management (ITRM), and as well as Business continuity and Disasters recovery planning. A role which allows positive individuals input as well as team work with a positive win-win attitude. I am willing to relocate and commute 100% to work as the job demand.

CORE BACKGROUND & COMPETENCIES

As an experienced professional Business System Specialist, I possess diverse skill set and extensive knowledge in System Technologies, Systems Auditing, Accounting & Finance, and Business Development. Throughout my career, I have worked with variety of organizations to include: Accounting & Financial Practice Firms, Corporate Audit Practice Firms, Retail Banking, Business Development Firms, Health Organizations, and Software Development Companies.

In my job titles, I excel in the following professional areas: Product Manager, Business Analysis, Product Ownership, Scrum Master, Software Testing and Technical Writing. With expertise in Agile Project Management methodologies, Scrum framework and strong understanding of UI/UX, I am capable of handling full-stack End-user Development roles. My focus lies in Business Information Systems, Technology Processes, and Change Management.

I leverage my knowledge and skills to revamp business processes, mitigate risks, reduce operational costs, enhance user experience and service delivery, improve product quality, and retain customers, increase sales for organizations and documenting user guides. I am particularly passionate about fostering the growth of Small to Medium Enterprises (SMEs) and alternative business organizations, helping them transform into successful corporations.
